tl;dr newish player (1d playtime) said they wanted \$10k for a golden drill. We agreed, and I paid the \$10k. After this, the new player dropped an item. I think it was a plain chest, but they claim it was a bug and golden drill.

papam_franciscus 6/10/2026, 11:22:11 PM

When I offered to reverse, they didn't do that.

papam_franciscus 6/10/2026, 11:25:24 PM

I want to check with staff to ensure this isn't a bug before I proceed further; if it's a bug with golden drills stacking on top of existing chests, then that would be serious and something you all would need to fix.
