Prepared for Matthew Graham

01 Analyzed text

No passages highlighted.

Your Honour,

Defendant's revised interrogatory asks:

"Would the plaintiff please point out any position under the bank, that a person could be physically manifested in, that is not within the bank's vault?"

To the best of my ability, I cannot truthfully identify or rule out every physically accessible position underneath or around the bank from the evidence currently available to me.

There are several reasons for that answer.

First, I am presently subject to a short deportation and cannot enter the server to inspect the bank's current physical layout, region boundaries, elevations, or surrounding underground spaces.

Second, even if I had access to the server, I do not believe it would be reasonable for me to conduct an in-game physical experiment by entering restricted portions of the bank to determine which locations are or are not part of the vault. The Criminal Code separately defines Bank Trespass as being behind the bank's No Trespassing

sign and Bank Robbery as trespassing specifically within the vault. Physically testing those boundaries could expose me to additional criminal charges.

Third, the evidence presently before the Court does not provide me with the information necessary to reconstruct the exact physical relationship between P-002, the photographer, my nametag, and the defined vault boundary. P-002 does not contain my coordinates or region information. The original criminal record has not established the precise camera mechanics, viewing angle, distance, player positioning, or any tools or visual mechanisms the photographer used when the original image was captured.

P-002 also visibly contains a "Freecam has been disabled" message. Plaintiff does not presently allege that freecam was used to obtain the screenshot, but the message further demonstrates that the precise viewing mechanics and circumstances under which the image was captured are not established by the photograph itself.

Defendant has stated during Discovery that P-002 was the evidence DHS relied upon for the first Bank Robbery conviction and that DOJ later recreated the image using P-002 and visual cues. That later reconstruction does not give me independent personal knowledge of every location that could have produced the original image. I therefore cannot honestly point the Court to a specific alternative coordinate and represent that it is definitively outside the vault.

I would also respectfully distinguish that lack of personal knowledge from the burden at issue in the underlying conviction. I am not asserting that I must have been at a particular alternative location. My challenge is that the Commonwealth must prove that the evidence supporting Count One showed I was specifically inside the bank vault, the location element required for Bank Robbery.

The Judicial Standards Act places the burden of proving a criminal offense on the Commonwealth and requires proof beyond a reasonable doubt. The fact that I cannot presently identify every possible alternative underground location does not itself establish that the one location asserted by the Commonwealth has been proven beyond a reasonable doubt.

Accordingly, my truthful answer is:

01 Analyzed text

No passages highlighted.

Based on the evidence currently available to me, I do not know and cannot reliably identify a specific accessible position under the bank outside the vault. I also do not have sufficient information to conclude that no such position exists.

Reading the score

Human: below 15%. Mixed: 15-29%. Likely AI: 30% or higher.
Scores of 75% and above display as 100%, as on screen.

Reading the highlights

Highlights mark passages flagged by the model. Darker tints indicate higher sentence scores when available. Sentence scores are separate from the document score.
